

ADJUST[®] 38 AC

**FOR THE MANAGEMENT OF FRUITING AND EXCESSIVE
VEGETATIVE GROWTH IN COTTON**

Albaugh ADJUST[®] 38 AC Plant Growth Regulator is a foliar applied plant growth regulator. It allows growers to manage cotton plants for short-season production leading to reduced risk of yield and quality loss due to delayed and prolonged harvest. Benefits derived from the use of ADJUST[®] 38 AC include increased early boll retention and/or larger bolls, reduced plant height which provides a more open canopy/less boll rot, improved defoliation, less trash and lower ginning costs, better harvest efficiency and a darker leaf color. These benefits can provide for earlier maturity and often result in improved yields.

PRODUCT OVERVIEW

- Crop safe formulation of mepiquat chloride for use in cotton management programmes.
- Flexibility for low-rate multiple applications, or higher, less frequent dosages allow usage under a wide range of growing conditions.
- Offers excellent compatibility with insecticides and miticides.
- The premier choice for cotton growers, with proven performance and reliable results.
- Multiple pack sizes available catering for grower needs.

ACTIVE INGREDIENT

38 g/L Mepiquat present as the Chloride

FORMULATION

Aqueous Concentrate

POISON SCHEDULE

Schedule 5

COMPARE TO

Various

MODE OF ACTION

Gibberellic acid biosynthesis inhibitor

SIGNAL HEADING

CAUTION
KEEP OUT OF REACH OF CHILDREN
READ SAFETY DIRECTIONS BEFORE OPENING OR USING

WITHHOLDING PERIOD

Do not apply later than 4 weeks before harvest

PACKAGING

20LTR, 110LTR, 1000LTR

APVMA APPROVAL NO.

56331/141418

STATES AND TERRITORIES REGISTERED

NSW & QLD

See label for complete application guidelines and restrictions.
