

AKARI® 625 AC

PHENOXY HERBICIDE

For the control of broadleaf weeds in fallow before direct drilling or sowing of cereal and pastures; and in cereal crops, pastures, sugar cane, peanuts and non-agricultural areas as per the Directions for Use.

PRODUCT OVERVIEW

- Where weeds are to be sprayed in a CROP or PASTURE, use only the rate given for the particular crop or situation indicated on the label. In most cases Albaugh AKARI® 625 AC Herbicide will give control, however some hard to kill weeds or those in advanced stages of growth may only be suppressed.
- The rates listed in the weed table on the label are for use where weeds are present, and no crop or pasture is involved. Use at these rates in a crop or pasture, other than for spot spraying, may cause damage.
- AKARI® 625 AC should only be used in those States where a rate or range of rates is indicated for the particular weeds listed.
