

ESCUDO® 250 SC

BROAD-SPECTRUM, PREVENTIVE FUNGICIDE WITH SYSTEMIC AND CURATIVE PROPERTIES RECOMMENDED FOR THE CONTROL OF MANY IMPORTANT PLANT DISEASES.

Albaugh ESCUDO® 250 SC Fungicide is a broad-spectrum preventive fungicide with systemic and curative properties, recommended for the control of many important plant diseases. These additional benefits are due to positive effects in plant physiology. The effects may vary according to factors such as crop, crop hybrid, or environment.

Under certain conditions, conducive to extended infection periods, use another registered fungicide for additional applications if the maximum amount of ESCUDO® 250 SC has been used. If resistant isolates to Group 11 fungicides are present, efficacy can be reduced for certain diseases. The higher rates in the rate range and/or shorter spray intervals may be required under conditions of heavy infection pressure, with highly susceptible varieties, or when environmental conditions are conducive to disease.

PRODUCT OVERVIEW

- Provides long-lasting, broad-spectrum control of a variety of diseases, including Anthracnose, powdery mildew, downy mildew, grey leaf spot, leaf blights and leaf spots.
- Includes preventive control of all four classes of fungi, with systemic and curative properties.
- Moves through the plant to provide more complete disease protection.
- May be applied as a foliar spray in alternating spray programs, or as tank mix with other registered products.
- Registered in 10 crops across Australia.

ACTIVE INGREDIENT

250 g/L Azoxystrobin

F.R.A.C. GROUP

GROUP 11 FUNGICIDE

FORMULATION

Suspension Concentrate

POISON SCHEDULE

Schedule 5

COMPARE TO

Amistar®

MODE OF ACTION

Qol inhibitor
