

CRUSADER[®] 2ME

FAST-ACTING PYRETHROID INSECTICIDE, EFFECTIVE AGAINST A WIDE RANGE OF FOLIAR PESTS IN CROP AND NON-CROP APPLICATIONS.

Crusader[®] 2ME is a non-systemic pyrethroid insecticide in a microencapsulated formulation that provides rapid knockdown with residual activity. Initial and residual control are contingent upon thorough crop coverage. Apply with ground or aerial equipment using sufficient water to obtain full coverage of foliage. Apply in a minimum of 2 gallons per acre by air or 10 gallons per acre by ground unless otherwise specified in this label. When foliage is dense or pest pressure is high (heavier insect or egg pressure, larger larval stages), use of higher listed application volumes and/or higher listed use rates may improve initial and residual control. For cutworm control, this product may be applied before, during, or after planting. For soil-incorporated applications, use higher listed rates for improved control.

PRODUCT FEATURES

- Fast-acting, broad-spectrum pyrethroid insecticide that will control pests with a single application.
- Labeled for use on a wide range of crops.
- Works by contact and ingestion; residual solution for growers to control insects, whether or not the pest is directly sprayed.
- May be applied by ground, aerial or chemigation application systems.

See label for complete application guidelines and restrictions.

ACTIVE INGREDIENT

2.08 lbs/gal lambda-cyhalothrin

IRAC GROUP

3

FORMULATION

Capsule suspension

REI

24 hrs

COMPARE TO

Warrior[®] II

MODE OF ACTION

Sodium channel modulator

SIGNAL WORD

Caution

RESTRICTED USE

Yes

PACKAGING

4 x 1 gal, NR 265
