

## FUNGICIDE

# AZPROP SELECT™

**BROAD-SPECTRUM, PREVENTIVE  
COMBINATION FUNGICIDE.**

AzProp Select™ combines two of the most effective active ingredients to deliver broad-spectrum disease control on cool- and warm-season turf species. The highly systemic formula allows for control of certain pathogens causing foliar, stem, and root diseases, including leaf and stem blights, leaf spots, patch diseases, mildews, anthracnose, fairy rings, molds, and rusts of turfgrass plants.

## PRODUCT FEATURES

- Two modes of action for disease-resistance management and broad-spectrum control.
- Excellent rotational product for programmed disease management.
- Defends against both soil-borne and foliar diseases.
- Complete root-to-leaf distribution.
- Excellent residual control.

## LABELED USES

- Golf turf
- Residential lawns, landscape areas
- Parks/Rec
- Athletic fields
- Residential and commercial buildings

See label for complete application guidelines and restrictions.

### ACTIVE INGREDIENTS

5.73% azoxystrobin  
9.54% propiconazole

### FRAC GROUP

Azoxystrobin - Group 11  
Propiconazole - Group 3

### FORMULATION

Liquid

### CHEMICAL FAMILY

Group 3 and 11 fungicides  
DeMethylation inhibitors (Triazoles)  
Strobilurin/QoI inhibitors  
(Methoxyacrylates)

### COMPARE TO

Headway®

### MODES OF ACTION

Cell membrane disrupter  
and respiration inhibitor

### RESTRICTED USE

No

### SIGNAL WORD

Caution

### PACKAGING

12 x 1 qt, 4 x 1 gal, 2 x 2.5 gal

### EPA REG NUMBER

89442-41

# AZPROP SELECT™

**BROAD-SPECTRUM, PREVENTIVE COMBINATION FUNGICIDE.**

## APPLICATION INFORMATION

When fungicides are used repeatedly in the same fields, a gradual or total loss of pest control may occur over time. Appropriate resistance-management strategies should be followed. To delay fungicide resistance, take one or more of the following steps:

- Rotate the use of **AzProp Select™** or other Group 3 or Group 11 fungicides within a growing season sequence with different groups that control the same pathogens.
- Monitor treated fungal populations for resistance development.
- Contact your local extension specialist or certified crop advisor for any additional pesticide resistance management and/or IPM recommendations for specific crops and pathogens.

## Integrated Pest Management (IPM)

Sound turf management resulting in healthy, vigorous turf is the foundation of a good IPM program. Cultural practices such as proper choice of turf variety, nutrient management, proper cutting height, thatch management, and proper watering, drainage, and moisture stress management shall be integrated with the use of fungicides to increase turf vigor and reduce the susceptibility to disease. Immunoassay detection kits and extension service diagnostic services can assist in the early and accurate identification of causal organisms and corresponding selection of the proper fungicide when required.

## Restrictions

**DO NOT** graze or feed clippings from treated turf areas to animals.

**DO NOT** apply **AzProp Select** to turf by air.

## LABELED DISEASES

Anthracnose	Dollar spot	Leaf spot	Pink snow mold	Southern blight
Bentgrass dead spot	Fairy ring	Melting out	Powdery mildew	Spring dead spot
Brown patch (Largepatch, Zoysia patch and Leaf and sheath spot)	Gray leaf spot	<i>Microdochium</i> patch	<i>Pythium</i> blight	Summer patch
Cool weather brown patch (Yellow patch)	Gray snow mold	Necrotic ring spot	<i>Pythium</i> root rot	Take-all patch
	Leaf rust	Pink patch	Red thread
