

HERBICIDE

2,4-D AMINE 4

**LOW-VOLATILE PHENOXY HERBICIDE FORMULATION
THAT CONTROLS A VARIETY OF BROADLEAF WEEDS.**

Best results are obtained when product is applied to young, succulent weeds that are actively growing. The lower recommended rates will be satisfactory on susceptible annual weeds. For perennial weeds and conditions such as the very dry areas of the western states, where control is difficult, the higher recommended rates should be used. Some plants and weeds, especially woody varieties, are difficult to control and may require repeat applications, if permitted by label.

Apply 1-5 gallons of total spray by air or 5-25 gallons by ground equipment, unless otherwise directed. In either case, use the same amount of 2,4-D recommended per acre.

PRODUCT FEATURES

- A solvent-free, highly soluble formulation that forms a homogeneous solution.
- Superior formulation provides flexibility in mixing with other herbicides for additional weed control options.
- Effective in controlling more than 95 broadleaf weeds when applied at the young and active growing stage.
- Broad label uses including ornamental turf, grasses cut for hay, forestry, and aquatic weed control.
