

SELECTIVE HERBICIDE

Sublime™

HERBICIDE

SELECTIVE, BROAD-SPECTRUM CONTROL OF WEEDS IN ORNAMENTAL TURFGRASSES.

Sublime™ is the only product on the market powered by the combination of triclopyr, dicamba, and mesotrione. This innovative non-phenoxy formulation reliably delivers a much wider spectrum of selective, postemergence and residual control, particularly on many of the most challenging broadleaf and grass weeds in turfgrass. In addition to an unprecedented level of performance, the unique blend of active ingredients in **Sublime** suppresses the common and unsightly bleaching symptoms that can be caused by mesotrione alone.

PRODUCT FEATURES

- Outstanding broadleaf weed control, including spurge, yellow woodsorrel, and wild violet.
- Proprietary, non-2,4-D formulation.
- Suppresses bleaching compared to mesotrione alone.

LABELED USES

- Ornamental turf lawns (residential, industrial and institutional)
- Golf courses (fairways, aprons, tees and roughs)
- Parks and athletic fields
- Sod farms
