

RANGESTAR[®]

**BROAD-SPECTRUM BROADLEAF WEED AND BRUSH
CONTROL IN GRASS FORAGES AND SELECTED
ROW CROPS.**

Range Star[®] is a selective postemergence herbicide for control of a wide spectrum of annual, biennial, and perennial broadleaf weeds and brush in grass forages and selected row crops, as described on the product label.

Apply Range Star at the labelled rates and growth stages in the Annual Weeds and the Biennial and Perennial Weeds rate tables unless instructed differently in the Food/Feed Crop Specific Information or Non-Food/Feed Use-Specific Information sections of the label. The most effective application rate and timing varies based on the target weed species. In mixed weed populations, the correct rate is determined by the weed species requiring the highest rate. Inadequate control may be observed if application is delayed since weeds may exceed the maximum size stated on the product label.

PRODUCT FEATURES

- Controls a broad range of tough broadleaf weeds including Kochia, ragweeds, pigweeds, thistles, field bindweed, dandelion and others.
- Readily absorbed by plants through shoot and root uptake, translocates throughout the plant's system, and accumulates in areas of active growth.
- May be applied using aerial, broadcast, band, or spot spray applications, using water or sprayable fluid fertilizer as a carrier (as specified on the product label).

FREQUENTLY ASKED QUESTIONS

What additives should I use with Range Star for improved control of emerged weeds?

- Surfactants and/or low use rate liquid fertilizers (28-0-0, 32-0-0) or crop oil concentrate (non-food/feed crop uses only) can be used with Range Star. *Refer to label for details regarding the use of AMS or liquid fertilizers.*
