

## FUNGICIDE

# AZOXY D SELECT™

**TWO ACTIVE INGREDIENTS PROVIDE EXCELLENT PERFORMANCE IN HIGH TEMPERATURES.**

**Azoxyl D Select™** is a great tool for golf turf disease management. Formulated with two powerful ingredients combining FRAC 11 and FRAC 3 modes of action. **Azoxyl D Select** provides broad-spectrum disease control and resistance management utility even under high-temperature conditions during the summer months.

## PRODUCT FEATURES

- Labeled for the control of more than 20 turf diseases including anthracnose, brown patch, dollar spot, fairy ring, gray leaf spot, Southern blight, Summer patch, take-all patch and *Waitea* patch.
- Contains azoxystrobin and difenoconazole.
- No growth regulation effects or phytotoxicity.
- No heat restrictions.
- Dual modes of action provide disease resistance management protection.
- Preventive and curative protection.
- Convenient liquid formulation for easy tank mixing.
- Exceptional rainfastness and rapid uptake.

## LABELED USES

- Golf course turfgrass

See label for complete application guidelines and restrictions.

### ACTIVE INGREDIENT

18.2% azoxystrobin  
11.4 % difenoconazole

### FRAC GROUP

Azoxystrobin - Group 11  
Difenoconazole - Group 3

### FORMULATION

Suspension concentrate

### CHEMICAL FAMILY

Strobilurin/QoI inhibitors  
DMI (demethylation inhibitors)/triazoles

### COMPARE TO

Briskway®

### MODE OF ACTION

Cell membrane disrupter  
and respiration inhibitor

### RESTRICTED USE

No

### SIGNAL WORD

Caution

### PACKAGING

4 x 1 gal

### EPA REG NUMBER

89442-54

# AZOXY D SELECT™

TWO ACTIVE INGREDIENTS PROVIDE EXCELLENT PERFORMANCE IN HIGH TEMPERATURES.

## APPLICATION INFORMATION

**Azoxy D Select™** is recommended for the control of more than 20 troublesome diseases on golf course turf only, and is most effective when applied prior to disease development. Apply **Azoxy D Select** in sufficient spray solution for good turf coverage, which is required for good disease control. Repeat applications at specified intervals for as long as required. For the control of foliar diseases, allow **Azoxy D Select** to dry before irrigation. For the control of soil-borne diseases, **Azoxy D Select** can be watered-in after application.

**Azoxy D Select** is a broad-spectrum fungicide containing two active ingredients for application as a foliar spray, in alternating spray programs, or in tank mixes with other registered pesticides. **Azoxy D Select** is compatible with many commonly used fungicides, liquid fertilizers, herbicides, insecticides, and biological control products. If tank mixes are desired, observe all directions, precautions, and limitations on labeling of all products used.

Under certain conditions conducive to extended infection periods, use another registered fungicide for additional applications if the maximum annual amount of **Azoxy D Select** has already been used. If resistant isolates to Group 11 or Group 3 fungicides are present, efficacy can be reduced for certain diseases. The higher rates in the rate range and/or shorter spray intervals may be required under conditions of heavy infection pressure with highly susceptible varieties, or when environmental conditions are conducive to this disease pressure.

## LABELED DISEASES

Anthracnose	Fairy ring	<i>Microdochium</i> patch	Red thread	Summer patch
Brown patch	Gray leaf spot	Necrotic ring spot	<i>Rhizoctonia</i> large patch	Take-All patch
Cool weather brown patch	Gray snow mold	Pink patch	Rusts (leaf, stem, stripe)	<i>Waitea</i> patch
Dollar spot	Leaf spot melting out	Powdery mildew	Southern blight
