FIFRA Labelling	
EPA Registration Number	45002-56
This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of non-pesticide chemicals. Following is the hazard information as required on the pesticide label.	
FIFRA Signal Word	Caution
FIFRA Precautionary Statement	KEEP OUT OF REACH OF CHILDREN. Hazards To Humans and Domestic Animals.
FIFRA Human Health Hazards	Harmful if swallowed or inhaled. Avoid breathing spray mist. Causes moderate eye irritation. Remove and wash contaminated clothing before reuse. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
FIFRA First Aid	<p>IF SWALLOWED:</p> <ul style="list-style-type: none">•Immediately call a poison control center or doctor for treatment advice.•Do not induce vomiting unless told to do so by a poison control center or doctor.•Have person sip a glass of water if able to swallow.•Do not give anything by mouth to an unconscious person. <p>IF IN EYES:</p> <ul style="list-style-type: none">•Hold eye open and rinse slowly and gently with water for 15-20 minutes.•Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.•Call a poison control center or doctor for treatment advice. <p>IF INHALED:</p> <ul style="list-style-type: none">•Move person to fresh air.•If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth if possible.•Call a poison control center or doctor for further treatment advice. <p>NOTE TO PHYSICIAN: No specific antidote. Treat symptomatically.</p>
FIFRA Environmental Hazards	<p>This product is toxic to estuarine/marine invertebrates, and freshwater/estuaries/marine aquatic plants. DO NOT apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. DO NOT contaminate water when disposing of equipment washwater or rinsate.</p> <p>Degradate of Prothioconazole are known to leach through soil into ground water under certain conditions as a result of label use. These chemicals may leach into groundwater if used in areas where soils are permeable, particularly where the water table is shallow.</p> <p>SURFACE WATER ADVISORY: This product may impact surface water quality due to runoff rainwater. This is especially true for poorly draining soils and soils with shallow groundwater. This product is classified as having high potential for reaching surface water via runoff for several months or more after application. A level, well maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of Prothioconazole and degradates from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall or irrigation is expected to occur within 48 hours.</p>
FIFRA Physical Hazard	DO NOT mix or allow coming in contact with oxidizing agents. Hazardous chemical reaction may occur.
